### Product Highlight—Web Design Team

#### Jump Start Your Next Web Project

The KDSI Web Team has access to a library of more than 3,000 fantastic looking web templates. These professionally designed templates can be tailored for ALL sorts of businesses and are a great way for you to get an idea of the look and feel of your site before the design process begins.

Using a template can cut your development costs in half. However, we can easily customize the site with your unique look and feel with new graphics and a new color scheme. e-mail us at [info@kdsi.net](mailto:info@kdsi.net) for more information. Be sure to tell us a little about your business and the type of site you have in mind— we'll send you some FREE samples.

Lastly, existing customers already know the best feature available to our hosting customers is the personalized service you get—real, live people standing by to help when you have a question!

### What's New @ KDSI—Announcing our 10 Year Anniversary

As 2004 comes to a close, we find ourselves reflecting on a successful 2004 and looking ahead with earnest to the new year. 2005 is special for KDSI because it marks our 10th Anniversary! And, what better way to celebrate than to give away fun gifts to our customers! We're calling it 10-4-10. Every month we will give away 10 prizes for the 10 years we've been in business. For instance, we may give away 10 gallons of gas, or 10 pounds of M&M's. Plus, the winner from each month will qualify for a grand prize. Watch our web site throughout 2005 for opportunities to win.

Speaking of our web site...we're starting the new year with a new KDSI web site. It will have much of the same information, but it will have a fresh new look with improved navigation. Watch for our new site and let us know what you think!

At this holiday time, please accept this sincere wish for a wondrous Christmas and a joyous New Year from all of us here at KDSI.

### Industry News—Blogging

A blog (short for **weblog**) is simply a continuing online expression of an opinion or a view written for the reading pleasure or displeasure of anyone interested. Once upon a time, only the bold would blog. Today, it's becoming quite popular and there are tools out there to make it easy.

For a more colorful and lengthy definition of blogging, point your browser to [http://infestation.typepad.com/essence/2004/11/bloggng\\_define.html](http://infestation.typepad.com/essence/2004/11/bloggng_define.html)

### December Internet Tip—Microsoft Windows: Using the Recycle Bin

The Recycle Bin is a safety net when deleting files or folders in Windows. When you delete an item from your hard drive (C:), Windows places it in the Recycle Bin. The icon will change to indicate when items are being held in the Recycle Bin. NOTE: Items deleted from a floppy disk or a network drive are permanently deleted and are not sent to the Recycle Bin!

Items in the Recycle Bin remain there until you permanently delete them from your computer. These items can be restored in their original location. Although the item is no longer in any of your folders, it is still on the hard drive and takes up space. You will need to periodically empty the Recycle Bin to free up this hard drive space. NOTE: Deleting an item from the Recycle Bin permanently removes it from your computer and cannot be restored.

To delete or restore files in the Recycle Bin, double-click Recycle Bin icon on the desktop. Do one of the

following: To restore an item, select it, and then on the File menu, click Restore. The item will be restored in its original location. (To restore all of the items, first click Select All on the Edit menu.) The items will be restored in their original location. To delete an item, right-click it, and then click Delete. (To delete all of the items, first click Select All on the Edit menu.)

TIPS: You can also delete items by dragging them into the Recycle Bin. If you hold [Shift] while deleting, the item is deleted from your computer without being stored in the Recycle Bin.
