### **NEW INTERNET WORM/VIRUS**

The most recent Internet worm, WORM\_SOBER.AG, appears to be infecting many of our users. Affected users are often unaware that this worm is sending out email messages from their machines.

The greater issue isn't about this worm, but yet another reminder how important it is to keep each computer that is on your home/office network current with the latest anti-virus and anti-spyware products.

A few that we recommend are:

Anti-Virus:

- [AVG](#)
- [Norton](#)
- [McAfee](#)

Anti-spyware:

- [AdAware](#)
- [Microsoft's free anti-spyware](#) (beta) (FOR Windows XP ONLY)

Lastly, if you download one of the software products above and it expires, it isn't protecting your system. Double check to make sure all of your definitions are current.

### **KDSI HIGH SPEED DSL SPECIAL OFFER**

There is still time to get signed-up for the December DSL promotion! With a qualifying telephone line, you can get the KDSI portion of your DSL connection for only \$9.95/month! Special available to new residential DSL customers. Service not available in all areas. HURRY, offer ends December 31, 2005.
